## Professional Summary

I am a highly motivated and dedicated individual with a passion for technology, which has been a significant part of my life for many years. There's no doubt that I want to dedicate my future to this field. I make it a priority to stay as informed as possible, as there are always new and exciting opportunities emerging. I find great satisfaction in immersing myself in challenging tasks that are not easily resolved. In my spare time, I manage my own ESXi server at home, where I constantly experiment with new configurations and technologies. This hobby continuously inspires me to explore and innovate.

## Employment History

### Data technician apprentice, JF Data Service ApS. Rønne, hovedstaden

Feb. 2020 - Present

As part of my education, I was required to complete a four-year apprenticeship. I had the fortunate opportunity to join JF-Data, where my primary responsibility was first-level support. In this role, I provided general IT support and performed installation tasks. My duties included installing endpoints, servers (primarily in VMware ESXi environments, as well as numerous bare-metal servers), and conference systems.

JF Data Service is a relatively small company, which allowed me to experience a broad range of responsibilities due to the overlap in tasks. Consequently, I have developed a diverse skill set. Additionally, I provided extensive on-site support for ATEA and InfoCare (now Onitio), offering warranty support services for a variety of products including HP (both endpoints and servers), Dell endpoints, and Lenovo endpoints.

## Education

### Zealand Business College, Ringsted

Data technician with a specialty in infrastructure, the Data and Communication programme, Present

### Iselingskolen Skole, Vordingborg

High School Diploma, Jun. 2017
